EDUCATION

• Gettysburg College, Gettysburg, PA

Aug 2023 – Present

- Order of Omega — Bachelor of Science in Computer Science and Mathematics — GPA: 3.58
- Technical Skills: Python, JavaScript, C++, SQL, Java, Kotlin, React, Next.js, TypeScript, Three.js, MongoDB, HTML, CSS, Tailwind CSS, React Native

EXPERIENCE

• Interfraternity Council (IFC) President – Gettysburg College, Gettysburg, PA

Jan 2025 – Present

- Elected to lead governing body representing 8 fraternities and 400+ members; preside over weekly Executive Board meetings and General Assembly sessions with chapter presidents and delegates.
- Established annual strategic goals across recruitment, accountability, risk management, and campus relations, aligning executive initiatives across all chapters.
- Partnered with senior college leadership to manage and align campus-wide Greek life policies and operations.
- Represented the college at the NGLA Leadership Conference, implementing governance best practices to enhance accountability and inter-chapter coordination.

• Corresponding Secretary – Xi Chapter of FIJI, Gettysburg, PA

Jan 2025 – Present

- Directed chapter communications across LinkedIn, Instagram, and alumni channels, increasing professional engagement by onboarding 100% of active members to LinkedIn.
- Launched a mentorship initiative in collaboration with the Center for Student Success to connect alumni with current members, strengthening career development pathways.
- Led the Pig Dinner Committee, delegating responsibilities and enforcing milestone accountability to execute one of the chapter's largest annual alumni events.
- Chaired weekly PR Committee meetings to ensure cross-functional coordination and event execution.

• Software Engineer Intern – Press 1, Colorado

Oct 2024 – Present

- Engineered and deployed a full-stack Learning Center Webapp using Django, DRF, React (Vite), and PostgreSQL, replacing manual Google Sheets workflows and centralizing 100% of student data management for 200+ users.
- Architected role-based authentication and automated communication pipelines with SendGrid and Celery task scheduling, reducing administrative workload by 40% and improving response time by 60%.

• Fuchs Problem Research Intern – Gettysburg College, Gettysburg, PA

May 2025 – June 2025

- Conducted an intensive 4-week research study on the Fuchs Problem, analyzing Linear, Dihedral, and Dicyclic Groups to determine realizability conditions within ring unit structures.
- Synthesized theoretical findings into formal research summaries and presented results to faculty mentors, strengthening proof-based reasoning and advanced algebraic modeling skills.

• Data Analyst Intern – Gettysburg College, Gettysburg, PA

May 2025 – August 2025

- Analyzed operational and engagement data for 4 on-campus dining facilities using Excel and SQL, generating biweekly performance reports used by 3 management teams.
- Identified efficiency gaps and allocation trends, contributing to process optimizations that improved service turnaround time by 15% and reduced supply waste.

• Peer Learning Associate – Gettysburg College, Gettysburg, PA

August 2024 – May 2024

- Mentored 40+ students in foundational CS courses (OOP, Data Structures, Python, Java), increasing assignment completion rates and strengthening overall academic performance.
- Designed and delivered interactive audio-visual learning modules tailored to diverse learning styles, enhancing engagement and improving concept retention in weekly sessions.

PROJECTS

- **Gettysburg FIJI Website** – Designed and deployed a responsive full-stack chapter website using Next.js, React, and Tailwind CSS, enabling 150+ members and alumni to access real-time updates and resources. Implemented dynamic routing and optimized server-side rendering to improve load performance by 35%.
- **3D Personal Portfolio** – Engineered an interactive 3D portfolio using Three.js, React, and Next.js, integrating custom animations and modular UI components. Optimized rendering performance and lazy-loaded assets to maintain sub-2s load times.
- **Focus Time (Productivity App)** – Built a modular Pomodoro productivity application using React with optimized state management and real-time timer logic, supporting customizable sessions and task tracking with smooth, minimal re-renders.
